### Contemporary anthropology festival in Pistoia, now in its 10th edition

A world-class, contemporary anthropology festival, Dialoghi sull'Uomo (Dialogues on Man) is now in its 10th edition. This year's theme is "The work of living together," featuring a wide range of discussions, performances, exhibitions and workshops related to ideas of integration, shared stories and languages, and breaking down barriers between (and within) cultures. Alongside the talks and initiatives at the heart of the program, a related photo exhibition will run: Paolo Pellegrin - Borders of Humanity, which features 60 photographs (some of them never before displayed) taken over 30 years in Algeria, Egypt, Palestine, Iraq and the United States, with the aim of showcasing how life is still divided along racial lines within the United States (May 24-June 30, Palazzo Comunale, Pistoia). For the full program, see [www.dialoghisulluomo.it](http://www.dialoghisulluomo.it).
